

Building Maintenance and Renovation Contractors

The Building Maintenance and Renovation Contractors policy from APOLLO provides protection for situations in which building maintenance or renovation work causes damage or injury to individuals or property. An organization's tools and equipment are also covered to reduce any potential downtime from loss or damage.

Why Liability and Tools Coverage Is Important:

- Commercial general liability insurance can cover you against claims for property damage or injury to others arising from your maintenance or contractor activities. For example, if improper maintenance of a building damaged neighboring premises or injured an individual, you may be covered.
- It's often difficult to appreciate just how valuable your work tools or equipment are to your operations until something happens to them. Damage or theft could occur at any time whether on the job site or while locked away for the night. With a tool and equipment floater, you can rest assured that you're covered and that operations are not unnecessarily disrupted.

Key Features

- CGL limits up to \$5 million
- Tool and equipment floater up to \$20K
- Installation floater up to \$20K
- Optional rip and tear endorsement up to \$10K
- Available in every province except Quebec
- Monthly pay from a credit or debit card is available
- Premium dependant on class
